SAFETY DATA SHEET

SECTION 1 - IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

Contact information

General

Par Sterile Products
870 Parkdale Road, Rochester, M.I. 48307
T: +1 (800) 828-9393
F: +1 (201) 829-9222
E-mail: drugsafety@parpharm.com

Emergency telephone number

Chemtrec (24-hour availability):
+1 (800) 424-9300 (USA and Canada)
+1 (703) 527-3887 (International; collect calls accepted)

Product identifier

Adrenalin® (epinephrine for Injection, USP);
Adrenalin® Chloride Nasal Solution (epinephrine nasal solution, USP)

Synonyms

Epinephrine chloride solution;

For epinephrine: 4-[1-hydroxy-2-(methylamino)ethyl]1,2 benzenediol

Trade names

Adrenalin®

Chemical family

Mixture - contains benzenediol derivative

Relevant identified uses of the substance or mixture and uses advised against

Bulk formulated pharmaceutical mixture/Formulated pharmaceutical product packaged in final form for patient use; indicated for the emergency treatment of severe acute allergic reactions, asthma, and chronic pulmonary disease.

Note

This SDS is written to address potential worker health and safety issues associated with the handling of the formulated product. This SDS will be revisited if more data become available.

Issue Date

1 May 2015
### SECTION 2 - HAZARDS IDENTIFICATION

<table>
<thead>
<tr>
<th>Classification of the substance or mixture</th>
<th>Drugs in the finished state and intended for the final user are not subject to labeling in the US, EU or Canada. Please consult the prescribing/packaging information. The classification and labeling listed below is for bulk Epinephrine Solution.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Regulation (EC) 1272/2008 [GHS]</td>
<td>Not classified</td>
</tr>
</tbody>
</table>

#### Label elements

- **CLP/GHS hazard pictogram**: None required
- **CLP/GHS signal word**: None required
- **CLP/GHS hazard statements**: None required
- **CLP/GHS precautionary statements**: None required
- **EU symbol/indication of danger**: None required
- **Risk (R) Phrase(s)**: None required
- **Safety Advice**: None required

#### Other hazards

Epinephrine (*i.e.*, adrenaline) is an endogenous neurotransmitter hormone and its primary effects are vasoconstriction, cardiac stimulation, and smooth muscle relaxation. The most common adverse effects reported with therapeutic use include transient/moderate anxiety, feelings of over stimulation, restlessness, headache, tremor, weakness, shakiness, dizziness, sweating, increased heart rate, palpitations, paleness, nausea, vomiting, and difficulty breathing. Other symptoms, such as high blood pressure, cardiac arrhythmias, and cerebral bleeding, have occurred. As epinephrine can cross the placenta, it may adversely affect the fetus (*e.g.*, reduce fetal oxygen levels due to constriction of blood vessels).

#### US Signal word

None required

#### US Hazard overview

None required

#### Note

This mixture does not meet criteria for classification according to directive 1999/45/EC and Regulation EC No 1272/2008 (EU CLP). Nevertheless, it should be regarded as dangerous/hazardous because it contains a pharmacologically active substance and should be handled with care. The GHS classifications are based on Regulation (EC) 1272/2008. The EU symbol/indicator of danger, R Phrases and Safety Advice are based on Directive 1999/45/EC.
SECTION 3 - COMPOSITION/INFORMATION ON INGREDIENTS

</tr>
</tbody>
</table>

Note

The ingredient(s) listed above are considered dangerous/hazardous. The remaining components are non-dangerous/not hazardous and/or present at amounts below reportable limits. See Section 16 for full text of EU and GHS classifications. The EU classification is based on Directive 67/548/EEC and the GHS classification is based on Regulation (EC) 1272/2008.

SECTION 4 - FIRST AID MEASURES

Description of first aid measures

Immediate Medical Attention Needed

Yes

Eye Contact

If easy to do, remove contact lenses, if worn. Immediately flush eyes with copious quantities of water for at least 15 minutes. If irritation occurs or persists, notify medical personnel and supervisor.

Skin Contact

Wash exposed area with soap and water and remove contaminated clothing/shoes. If irritation occurs or persists, notify medical personnel and supervisor.

Inhalation

Immediately move exposed subject to fresh air. If not breathing, give artificial respiration. If breathing is labored, administer oxygen. Immediately notify medical personnel and supervisor.

Ingestion

Do not induce vomiting unless directed by medical personnel. Do not give anything to drink unless directed by medical personnel. Never give anything by mouth to an unconscious person. Notify medical personnel and supervisor.

Protection of first aid responders

See Section 8 for Exposure Controls/Personal Protection recommendations.

Most important symptoms and effects, both acute and delayed

See Sections 2 and 11.
SECTION 4 - FIRST AID MEASURES …continued

Indication of immediate medical attention and special treatment needed, if necessary

Contains epinephrine, a potent vasoconstricting-agent. Medical conditions aggravated by exposure: cardiovascular diseases, hypertension, and hypersensitivity. Rapidly acting vasodilators can counteract the marked pressor effects of epinephrine. If accidental exposure occurs to an individual who is also taking one or more concomitant medications, consult the respective package or prescribing information for potential drug interactions.

SECTION 5 - FIREFIGHTING MEASURES

Extinguishing media

Use water spray (fog), foam, dry powder, or carbon dioxide, as appropriate for surrounding fire and materials.

Specific hazards arising from the substance or mixture

No information identified. May emit carbon monoxide, carbon dioxide, oxides of nitrogen and sulfur, nitric and sulfuric acid, hydrochloric acid, and other nitrogen-, sulfur-, and/or chlorine-containing compounds.

Flammability/Explosivity

No explosivity or flammability data identified. As product is an aqueous solution, it is not expected to be flammable or explosive.

Advice for firefighters

Wear full protective clothing and a self-contained breathing apparatus with a full facepiece operated in the pressure demand or other positive pressure mode. Decontaminate all equipment after use.

SECTION 6 - ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures

If product is released or spilled, take proper precautions to minimize exposure by using appropriate personal protective equipment (see Section 8). Area should be adequately ventilated. Do not breathe mist/spray.

Environmental precautions

Do not empty into drains. Avoid release to the environment.

Methods and material for containment and cleaning up

If vials are crushed or broken, DO NOT CAUSE MATERIAL TO BECOME AIRBORNE. For small spills, soak up material with absorbent, e.g., paper towels. For large spills, cordon off spill area and minimize the spreading of spilled material. Soak up material with absorbent. Collect spilled material, absorbent, and rinse water into suitable containers for proper disposal in accordance with applicable waste disposal regulations (see Section 13). Decontaminate the area twice with an appropriate solvent (see Section 9).

Reference to other sections

See Sections 8 and 13 for more information.
SECTION 7 - HANDLING AND STORAGE

Precautions for safe handling
If vials are opened, crushed or broken, follow recommendations for handling bulk formulated pharmaceutical agents (i.e., use of engineering controls and/or other personal protective equipment if needed). Wash thoroughly after handling.

Conditions for safe storage including any incompatibilities
Store at controlled room temperature (20-25°C) away from incompatible materials. Protect from light. Keep container upright. Discard unused portion.

Specific end use(s)
No information identified.

SECTION 8 - EXPOSURE CONTROLS/PERSONAL PROTECTION

Note
Dispose of broken vials in a sharps container.

Control Parameters/Occupational Exposure
None required for normal handling of packaged product. If handling bulk product or if vials are opened/crushed/broken: Selection and use of containment devices and personal protective equipment should be based on a risk assessment of exposure potential. Open handling must not be performed when handling potent substances, or substances of unknown toxicity. Material should be handled inside a closed process, ventilated enclosure, isolator or device of equivalent or better control that is suitable for dusts and/or aerosols.

Respiratory protection
None required for normal handling of packaged product. If handling bulk product or if vials are opened/crushed/broken: Choice of respiratory protection should be appropriate to the task and the level of existing engineering controls. For routine handling tasks, an approved and properly worn powered air-purifying respirator equipped with appropriate HEPA filters or combination filters should provide ancillary protection based on the known or foreseeable limitations of existing engineering controls. Use a positive-pressure air-supplied respirator if there is any potential for an uncontrolled release, when exposure levels are not known, or in any other circumstances where air purifying respirators may not provide adequate protection.

Hand protection
None required for normal handling of packaged product. Wear nitrile or other impervious gloves if skin contact is possible. Double gloves should be considered.

Skin protection
Wear appropriate gloves, lab coat, or other protective overgarment if skin contact is likely. Base the choice of skin protection on the job activity, potential for skin contact and solvents and reagents in use.

Eye/face protection
Wear safety glasses with side shields, chemical splash goggles, or full face shield, if necessary. Base the choice of protection on the job activity and potential for contact with eyes or face. An emergency eye wash station should be available.
SECTION 8 - EXPOSURE CONTROLS/PERSONAL PROTECTION …continued

*Environmental Exposure Controls*

Avoid release to the environment and operate within closed systems wherever practicable. Air and liquid emissions should be directed to appropriate pollution control devices. In case of spill, do not release to drains. Implement appropriate and effective emergency response procedures to prevent release or spread of contamination and to prevent inadvertent contact by personnel.

*Other protective measures*

Wash hands in the event of contact with this mixture, especially before eating, drinking or smoking. Protective equipment is not to be worn outside the work area (e.g., in common areas or out-of-doors).

### Additional acute toxicity information

*To err on the side of caution (due to the high potency of this substance), it is assumed that toxicity via inhalation may be comparable to the intravenous route.

### Irritation/Corrosion

No data available.

### Sensitization

No data available.

### STOT-single exposure

No data available.

### STOT-repeated exposure/Repeat-dose toxicity

In 13-week inhalation studies, increased respiratory rate, changes in respiratory epithelium, and increased heart/adrenal gland weight were observed in rats and mice exposed to 40 mg/m³ epinephrine (duration not specified). Additionally, degenerative lesions of the laryngeal muscle were seen in rats exposed to concentrations ≥20 mg/m³. In mice, inflammation of the glandular stomach and uterine atrophy were observed at concentrations ≥10 and 40 mg/m³, respectively.

### Reproductive toxicity

In hamsters, epinephrine caused a decrease in reproductive success at 500 µg/kg (route of administration not specified). In mice, epinephrine decreased sexual receptivity in female mice at subcutaneous (SC) doses of 40 µg (~1.6 mg/kg), but implantation success was not affected.

### Developmental toxicity

Adverse developmental effects have been reported in rabbits, mice, and hamsters at SC doses as low as 1.2, 1 and 0.5 mg/kg, respectively. Uterine vasoconstriction and impaired fetal gas exchange were observed in pregnant monkeys treated with intravenous (IV) doses of 0.5-20 µg/kg/min for 1 to 18 minutes. Fetal asphyxia was observed after epinephrine administration to pregnant monkeys at doses similar to those used in humans.

### Genotoxicity

Epinephrine was negative in the Ames bacterial mutagenicity assay and an in vivo micronucleus assay (species not specified). Although both negative and equivocal effects were observed in a chromosomal aberration assay with Chinese hamster ovary cells in the presence and absence of metabolic activation, respectively, the overall weight of evidence suggests a low genotoxicity potential.

### Carcinogenicity

Epinephrine was not carcinogenic in rats and mice exposed by inhalation to concentrations up to 5 and 3 mg/m³, respectively. None of the components present at levels greater than or equal to 0.1% are listed by NTP, IARC, ACGIH or OSHA as a carcinogen.

### Aspiration hazard

No data available.

Persistence and Degradability
No data identified.

Bioaccumulative potential
No data identified.

Mobility in soil
No data identified.

Results of PBT and vPvB assessment
Not performed.

Other adverse effects
No data identified.

Note
The environmental characteristics of this mixture have not been fully investigated. The above data are for the active ingredient and/or any other ingredient(s) where applicable. Releases to the environment should be avoided.

SECTION 13 - DISPOSAL CONSIDERATIONS

Waste treatment methods
Dispose of wastes in accordance to prescribed federal, state, and local guidelines, e.g., appropriately permitted chemical waste incinerator. Do not send down the drain or flush down the toilet. All wastes containing the material should be properly labeled. Rinse waters resulting from spill cleanups should be discharged in an environmentally safe manner, e.g., appropriately permitted municipal or on-site wastewater treatment facility.

SECTION 14 - TRANSPORT INFORMATION

Transport
Based on the available data, this product/mixture is not regulated as a hazardous material/dangerous good under EU ADR/RID, US DOT, Canada TDG, IATA, or IMDG.

UN number
None assigned.

UN proper shipping name
None assigned.
 SECTION 14 - TRANSPORT INFORMATION …continued

| Transport hazard classes and packing group | None assigned. |
| Environmental hazards | Based on the available data, this product/mixture is not regulated as an environmental hazard or a marine pollutant. |
| Special precautions for users | Avoid release to the environment. |
| Transport in bulk according to Annex II of MARPOL73/78 and the IBC Code | Not applicable. |

 SECTION 15 - REGULATORY INFORMATION

| Safety, health and environmental regulations/legislation specific for the substance or mixture | This SDS complies with the requirements under US, EU and GHS (EU CLP - Regulation EC No 1272/2008) guidelines. Consult your local/regional authorities for more information. |
| Chemical safety assessment | Not conducted. |
| OSHA Hazardous | No |
| WHMIS classification | Not required. Drugs are not subject to WHMIS. This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations and the SDS contains all of the information required by those regulations. |
| TSCA status | Drugs are exempt from TSCA. |
| SARA section 313 | Not listed. |
| California proposition 65 | Not listed. |
| Additional information | No other information identified. |

 SECTION 16 - OTHER INFORMATION

SECTION 16 - OTHER INFORMATION …continued

Full text of H phrases, P phrases and GHS classification

ATO4 - Acute Toxicity (Oral) Category 4. H302 - Harmful if swallowed. ATO2 - Acute Toxicity (Oral) Category 2. H300 - Fatal if swallowed. ATD2 - Acute Toxicity (Dermal) Category 2. H310 - Fatal in contact with skin. STOT-R1 - Specific Target Organ Toxicity Following Repeat Exposure Category 1. H372 - Causes damage to the cardiovascular system through prolonged or repeated exposure. RT1B - Reproductive toxicity Category 1B. H360Df - May damage the unborn child. Suspected of damaging fertility.
