SAFETY DATA SHEET

SECTION 1 - IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

Contact information

General

Par Sterile Products
870 Parkdale Road, Rochester, M.I. 48307
T: +1 (800) 828-9393
F: +1 (201) 829-9222
E-mail: drugsafety@parpharm.com

Emergency telephone number

Chemtrec (24-hour availability):
+1 (800) 424-9300 (USA and Canada)
+1 (703) 527-3887 (International; collect calls accepted)

Product identifier

Neostigmine Methylsulfate Injection

Synonyms

(m-hydroxyphenyl) trimethylammonium methylsulfate dimethylcarbamate.

Trade names

Not applicable

Chemical family

Mixture

Relevant identified uses of the substance or mixture and uses advised against

Bulk formulated pharmaceutical mixture/Formulated pharmaceutical product/mixture packaged in final form for patient use

Note

This SDS is written to address potential worker health and safety issues associated with the handling of the formulated product. Workers manufacturing this product should consult the SDSs of each hazardous ingredient for hazard information and handling recommendations.

SECTION 2 - HAZARDS IDENTIFICATION

Classification of the substance or mixture

Drugs in the finished state and intended for the final user are not subject to labeling in the US, EU or Canada. Please consult the prescribing/packaging information. The classification and labeling listed below is for bulk drug product.
Globally Harmonized System [GHS]

Acute toxicity - oral - Category 4.

Label elements

GHS hazard pictogram

GHS signal word

Warning

GHS hazard statements

H302 - Harmful if swallowed.

GHS precautionary statements

P264 - Wash hands thoroughly after handling. P270 - Do not eat, drink or smoke when using this product. P301+P312: IF SWALLOWED: Call a Poison Center or doctor/physician if you feel unwell. P330 - Rinse mouth. P501 - Dispose of contents/container to location in accordance with local/regional/national/international regulations.

Other hazards

Neostigmine methylsulfate is a cholinesterase inhibitor indicated for the reversal of the effects of non-depolarizing neuromuscular blocking agents after surgery. It may also be used to treat myasthenia gravis. It is usually give subcutaneously or intramuscularly, at a dose of 0.25 to 0.5 mg. Side effects may include salivation and excess bronchial secretions and runny nose, muscle tremors, bowel cramps and diarrhea, heartbeat irregularities, and increased urination. Overdosage may lead to increasing muscle weakness and respiratory arrest due to cholinergic crisis.

Note

This mixture is classified as hazardous according to Regulation EC No 1272/2008 (EU CLP) and Hazard Communication Standard No. 1910.1200 (US OSHA). The pharmacological, toxicological and ecological properties of this mixture have not been fully characterized. See Section 16 for full GHS classifications.

SECTION 3 - COMPOSITION/INFORMATION ON INGREDIENTS

<tbody>
<tr>
<td>Immediate Medical Attention Needed</td>
<td>Yes</td>
</tr>
<tr>
<td><strong>Eye Contact</strong></td>
<td>If easy to do, remove contact lenses, if worn. Immediately flush eyes with copious quantities of water for at least 15 minutes. If irritation occurs or persists, notify medical personnel and supervisor.</td>
</tr>
<tr>
<td><strong>Skin Contact</strong></td>
<td>Wash exposed area with soap and water and remove contaminated clothing/shoes. If irritation occurs or persists, notify medical personnel and supervisor.</td>
</tr>
<tr>
<td><strong>Inhalation</strong></td>
<td>Immediately move exposed subject to fresh air. If not breathing, give artificial respiration. If breathing is labored, administer oxygen. Immediately notify medical personnel and supervisor.</td>
</tr>
<tr>
<td><strong>Ingestion</strong></td>
<td>Do not induce vomiting unless directed by medical personnel. Do not give anything to drink unless directed by medical personnel. Never give anything by mouth to an unconscious person. Notify medical personnel and supervisor.</td>
</tr>
<tr>
<td><strong>Protection of first aid responders</strong></td>
<td>See Section 8 for Exposure Controls/Personal Protection recommendations.</td>
</tr>
</tbody>
</table>

**Most important symptoms and effects, both acute and delayed**

| Indication of immediate medical attention and special treatment needed, if necessary | Medical conditions aggravated by exposure: None known or reported. Treat symptomatically and supportively. If accidental exposure occurs to an individual who is also taking one or more concomitant medications, consult the respective package or prescribing information for potential drug interactions. |

**SECTION 5 - FIREFIGHTING MEASURES**

| Extinguishing media | Use water spray (fog), foam, dry powder, or carbon dioxide, as appropriate for surrounding fire and materials. |
| Specific hazards arising from the substance or mixture | No information identified. May emit carbon monoxide and carbon dioxide, oxides of nitrogen, and sulfur-containing compounds. |
SECTION 5 - FIREFIGHTING MEASURES …continued

Flammability/Explosivity
As product is an aqueous solution, it is not expected to be flammable or explosive.

Advice for firefighters
Wear full protective clothing and a self-contained breathing apparatus with a full facepiece operated in the pressure demand or other positive pressure mode. Decontaminate all equipment after use.

SECTION 6 - ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures
If product is released or spilled, take proper precautions to minimize exposure by using appropriate personal protective equipment (see Section 8). Area should be adequately ventilated. Do not breathe mist/vapors/spray.

Environmental precautions
Do not empty into drains. Avoid release to the environment.

Methods and material for containment and cleaning up
DO NOT CAUSE MATERIAL TO BECOME AIRBORNE. For small spills, soak up material with absorbent, e.g., paper towels. For large spills, cordon off spill area and minimize the spreading of spilled material. Soak up material with absorbent. Collect spilled material, absorbent, and rinse water into suitable containers for proper disposal in accordance with applicable waste disposal regulations (see Section 13). Decontaminate the area twice with an appropriate solvent (see Section 9).

Reference to other sections
See Sections 8 and 13 for more information.

SECTION 7 - HANDLING AND STORAGE

Precautions for safe handling
Follow recommendations for handling potent pharmaceutical agents (i.e., use of engineering controls and/or other personal protective equipment if needed). Avoid breathing vapor/mist/spray. Wash thoroughly after handling.

Conditions for safe storage including any incompatibilities
Store at 20° to 25°C (68° to 77°F). (See USP Controlled Room Temperature.) Protect from light. Store in carton until time of use.

Specific end use(s)
No information identified.

SECTION 8 - EXPOSURE CONTROLS/PERSONAL PROTECTION

Note
Dispose of broken vials in a sharps container.

#### Exposure/Engineering controls

None required for normal handling of packaged product. If handling bulk product or vials are opened/crushed/broken: Control exposures to below the OEL (if available). Otherwise, selection and use of containment devices and personal protective equipment should be based on a risk assessment of exposure potential. Open handling should not be performed when handling potent substances, or substances of unknown toxicity. Material should be handled inside a closed process, ventilated enclosure, isolator or device of equivalent or better control that is suitable for dusts and/or aerosols.

#### Respiratory protection

None required for normal handling of packaged product. If handling bulk product or vials are opened/crushed/broken: Choice of respiratory protection should be appropriate to the task and the level of existing engineering controls. For routine powder handling tasks, an approved and properly worn powered air-purifying respirator equipped with HEPA filters or combination filters should provide ancillary protection based on the known or foreseeable limitations of existing engineering controls. Use a positive-pressure air-supplied respirator if there is any potential for an uncontrolled release, when exposure levels are not known, or in any other circumstances where air purifying respirators may not provide adequate protection.

#### Hand protection

None required for normal handling of packaged product. Wear nitrile or other impervious gloves if skin contact is possible. Double gloves should be considered.

#### Skin protection

Wear appropriate gloves, lab coat, or other protective overgarment if skin contact is likely. Base the choice of skin protection on the job activity, potential for skin contact and solvents and reagents in use.

#### Eye/face protection

Wear safety glasses with side shields, chemical splash goggles, or full face shield, if necessary. Base the choice of protection on the job activity and potential for contact with eyes or face. An emergency eye wash station should be available.

#### Environmental Exposure Controls

Avoid release to the environment and operate within closed systems wherever practicable. Air and liquid emissions should be directed to appropriate pollution control devices. In case of spill, do not release to drains. Implement appropriate and effective emergency response procedures to prevent release or spread of contamination and to prevent inadvertent contact by personnel.

#### Other protective measures

Wash hands in the event of contact with this substance, especially before eating, drinking or smoking. Protective equipment is not to be worn outside the work area (e.g., in common areas or out-of-doors).

SECTION 9 - PHYSICAL AND CHEMICAL PROPERTIES …continued

Other information

- Molecular weight: Not applicable (Mixture)
- Molecular formula: Not applicable (Mixture)

SECTION 10 - STABILITY AND REACTIVITY

Reactivity: No information identified.

Chemical stability: Stable under normal handling and storage conditions.

Possibility of hazardous reactions: Not expected to occur.

Conditions to avoid: No information identified.

Incompatible materials: No information identified.

Hazardous decomposition products: No information identified.

SECTION 11 - TOXICOLOGICAL INFORMATION

Note: No data for this product/mixture were identified. The following data describe the active ingredient and/or the individual ingredients where applicable.

Information on toxicological effects

Route of entry: May be absorbed by inhalation, skin contact, eye contact, and ingestion.

<table>
<thead>
<tr>

<td>&gt;900 mg/m³</td>
</tr>
</tbody>
</table>

Irritation/Corrosion: Phenol can be corrosive to the skin.

Sensitization: No studies identified.

STOT-single exposure: Clinical signs in acute toxicity studies of neostigmine were consistent with muscarinic effects, including skeletal muscle weakness and twitching, constricted pupils, excessive salivation, intestinal hypermotility, difficulty breathing, and slowed heart rate.
STOT-repeated exposure/Repeat-dose toxicity
Tolerance appears to develop after repeated dosing of neostigmine. Rats were given 0.1 mg SC neostigmine twice daily for 22 to 25 days. Initial signs included tremors, ruffled fur, excess salivation, rapid breathing, weakness, and decreased activity. Severity declined after 4 to 6 days of dosing and were largely absent after 4 weeks. Repeated exposure to phenol by inhalation caused lung damage in rats.

Reproductive toxicity
No reproductive effects were noted in a rat reproductive study of neostigmine at IV doses of up to 8.1 µg/kg/day.

Developmental toxicity
NOAELs in a standard battery of developmental toxicity studies were the highest IV doses tested of 50 and 40 µg/kg/day neostigmine in rats and rabbits, respectively. This dose was associated with maternal effects (muscle twitching).

Genotoxicity
Neostigmine methylsulfate was nonmutagenic in the Ames assay. It was not clastogenic in vitro (chromosomal aberration assay in peripheral blood lymphocytes) or in vivo (mouse micronucleus test). Phenol is not mutagenic in the Ames assay but was mutagenic and clastogenic in mammalian cells. Results from an in vivo mouse micronucleus test were inconsistent, with some positive reports at high doses.

Carcinogenicity
Phenol is listed as Group 3: Not classifiable as to its carcinogenicity to humans, by IARC. None of the other components of the mixture present at levels greater than or equal to 0.1% are listed by NTP, IARC, ACGIH or OSHA as a carcinogen.

Aspiration hazard
No studies identified

Human health data
See "Section 2 - Other Hazards"

Persistence and Degradability
No data identified.

Bioaccumulative potential
No data identified.

Mobility in soil
No data identified.

Results of PBT and vPvB assessment
Not performed.

Other adverse effects
No data identified.

Note
The environmental characteristics of this product have not been fully investigated. Releases to the environment should be avoided.
SECTION 13 - DISPOSAL CONSIDERATIONS

**Waste treatment methods**

Dispose of wastes in accordance to prescribed federal, state, and local guidelines, e.g., appropriately permitted chemical waste incinerator. Do not send down the drain or flush down the toilet. All wastes containing the material should be properly labeled. Rinse waters resulting from spill cleanups should be discharged in an environmentally safe manner, e.g., appropriately permitted municipal or on-site wastewater treatment facility.

SECTION 14 - TRANSPORT INFORMATION

**Transport**

Based on the available data, this product is not regulated as a hazardous material/dangerous good under EU ADR/RID, US DOT, Canada TDG, IATA, or IMDG.

**UN number**

None assigned.

**UN proper shipping name**

None assigned.

**Transport hazard classes and packing group**

None assigned.

**Environmental hazards**

Based on the available data, this product/mixture is not regulated as an environmental hazard or a marine pollutant.

**Special precautions for users**

Avoid release to the environment.

**Transport in bulk according to Annex II of MARPOL73/78 and the IBC Code**

Not applicable.

SECTION 15 - REGULATORY INFORMATION

**Safety, health and environmental regulations/legislation specific for the substance or mixture**

This SDS generally complies with the requirements listed under current guidelines in the US, EU and Canada. Consult your local or regional authorities for more information.

**Chemical safety assessment**

Not conducted.

**TSCA status**

Drugs are exempt from TSCA.

**SARA section 313**

Not listed.

**California proposition 65**

Not listed.

**Additional information**

No other information identified.
